

Industrial Control Direct Marking System

Our plotter ICDMS together with the software VarioSign precisely identifies and labels various materials with a durable marking in a speedy manner. The key feature of the plotter is the compact design (labeling area 210 x 297 mm, 8.16 x 11.69 inch) for on site labeling tasks. All available common elements and tags for the industry, such as for terminal blocks, wires, cables, devices, cable ties, shrink tubing, labels, legend plates etc. can be labeled with this system.

At a glance:

Pen in pen holder

clean labeling with EK Plotter pens containing most durable ink

Pen storage

storage capacity of up to 2 pens

Engraving option

change the plotter with a few steps into an engraving unit

Support plates

fast and easy change of the support plates for various labeling elements

EK Vario Plotter VP 100 half size (A4)
